

NFLA ENGLISH FORUM SPRING WEBINAR - CONCERNS OVER SIZEWELL C, THE WEST CUMBRIA COAL MINE / OFFSHORE GDF ISSUES, LOCAL ENERGY & THE CLIMATE EMERGENCY

Friday 5th March 2021, 11.00am – 1pm

The NFLA English Forum spring webinar is considering three issues of real interest to its members:

- The **Sizewell C** new nuclear project is about to go to a full public inquiry – what are the main environmental and financial concerns of it going ahead?
- Cumbria County Council has decided to reopen consideration of an application to build a **deep-underground coal mine** close to Whitehaven. What are the climate change concerns around this development? Could it be used in the future for a deep-underground radioactive waste repository given Copeland Council is considering hosting such a development?
- Councils are all heavily involved in developing policies to promote a zero-carbon future. How can **decentralised energy** be progressed within the financial challenges of the Covid-19 pandemic?
